PUBLIC HEALTH REPORTS.

VOL. XXV.

FEBRUARY 25, 1910.

No. 8.

FOURTH INTERNATIONAL SANITARY CONFERENCE OF THE AMERICAN REPUBLICS.

[Held at San Jose, Costa Rica, December 25, 1909, to January 3, 1910.]

By R. H. VON EZDORF, Passed Assistant Surgeon, United States Public Health and Marine-Hospital Service.

The following-named republics were represented at the conference by a total of 19 delegates: Chile, Colombia, Costa Rica, Cuba, Guatemala, Honduras, Mexico, Nicaragua, Panama, Salvador, United States of America, and Venezuela. In addition, the Bureau of American Republics also sent a representative.

Dr. Juan J. Ulloa was president of the conference, with Dr. Luis Razette, Spanish secretary, and Dr. R. H. von Ezdorf, English secretary.

The inaugural session was held at the National Theater December 25, 1909, at 3 p. m., and was attended by the President of the Republic of Costa Rica, Licenciado Don Cleto Gonzalez Viquez, his cabinet, and the chief justice of the supreme court.

An address of welcome was made by the minister of foreign affairs, Don Ricardo Fernandez Guardia, followed by that of the president of the convention, Dr. J. J. Ulloa. Short addresses were also made by a delegate on behalf of each republic represented.

Following the order of the programme established at previous conferences, the appointment of vice-presidents was made, committees were named, and two secretaries for the convention were chosen. The succeeding sessions, beginning December 27, 1909, and ending January 3, 1910, were held at the hall of Congress.

The provisional programme was as follows:

1. Reports presented by different delegates in regard to the sanitary regulations and laws adopted and in force in their respective countries since the last meeting.
2. Special report by each official delegate regarding the manner in which the resolutions adopted in the three previous conventions have been put into practice in their respective countries.
3. Reports in regard to sanitary conditions in ports, and measures proposed for the improvement of such sanitary conditions (with special reference to the principal ports).
4. Reports relating to the registration of the movement of population and the rate of mortality in each country, specifying those of ports and principal cities.
5. Sanitation of cities and especially of ports.
6. Measures for the protection of passengers embarking in vessels from infected ports.
7. Discussion of measures against the introduction of diseases not included in the convention of Washington of 1905.
8. Sanitary models or forms to be adopted by nations forming part of this convention.
9. Discussion on sanitary measures relating to yellow fever, bubonic plague, tuberculosis, malaria, and other diseases, in conformity to new discoveries or experiences.
10. Discussion on measures relating to venereal diseases. (Omitted from final programme.)

11. Discussion on the necessity of the adoption, by the European nations, of the convention of Washington and other sanitary measures subsequently adopted by this convention with respect to such colonies as they have in America.

12. Discussion on new discoveries with respect to the transmission of yellow fever and malaria, besides the mosquito bite.

13. Organization in each country represented at this convention, of a commission of three physicians or health officers to act as delegates of the International Sanitary Bureaus of Washington or Montevideo, and to form part of the International Sanitary Information Committee of the American Republics.

The delegates of each country taking part at this convention, reported active progress with regard to sanitation in their respective countries, and showed an active interest in the matters under discussion at this convention.

RESOLUTIONS.

The following resolutions, approved by the executive committee, were adopted by the conference:

I.

With respect to bilharziosis, hydrophobia, leprosy, typhus fever, ankylostomiasis, etc., this committee suggests that recommendations be limited to requesting the various governments to take those measures of protection which they believe necessary.

II.

(a) To recommend especially to the various governments that they employ all possible means at their disposal to secure the effective sanitation of seaports to the end that the introduction of plague, cholera, and yellow fever, may be prevented, and in the event that a case of either of these diseases reaches a port, that it be promptly isolated, and measures taken to prevent its spread.

(b) To recommend special ordinances for the proper construction of rat-proof buildings, especially those designed for the storage of food stuffs such as markets, granaries, abattoirs, stables, etc.

(c) To make obligatory the use of galvanized-iron garbage cans with tight-fitting covers, for the reception of refuse from houses, and to arrange for the daily disposal of such refuse.

(d) That properly equipped laboratories be provided at all seaports where the periodical examination of rats may be made so that plague can be apprehended before its appearance in human beings.

(e) That the crusade against the mosquitoes, *Stegomyia calopus* and *Anopheles*, be carried on vigorously along lines which have been shown to bring the best results.

III.

(a) That careful statistics on population, morbidity, and mortality, be kept at every port, such data to be compiled at regular intervals of not more than one month, and also annually.

(b) Every port should be provided with a proper system of sewerage, an adequate supply of pure water, and paved streets.

(c) That all habitations be constructed with a view to furnishing fresh air and sunlight sufficient to maintain the health and vigor of

February 25, 1910

the inmates, and that the character of the construction shall conform to local conditions.

(d) That in every port there shall be a sanitary authority clothed with ample power to vigorously enforce sanitary ordinances.

(e) That it be made obligatory in schools to furnish instruction in the elementary principles of hygiene and sanitation. This instruction should be objective, or by means of the publication of simple rules, or both.

IV.

(a) That it is the duty of owners and masters of vessels to rid their vessels of rats and to use all possible means to keep them free therefrom.

(b) That this should be accomplished by the periodical fumigation of holds of vessels with sulphur gas, at periods of from three to six months, and at times when advantage may be taken of the vessels being free from cargo or laid up for repairs; and at all other times vigilance should be exercised by the masters for the destruction of rats by such other means as they may deem most effective.

V.

(a) That no person be allowed to embark who is suffering from a quarantinable disease, or from scarlet fever, measles, diphtheria, or any other communicable disease.

(b) For permitting the embarkation of passengers and crew who have been presumably exposed to infection where the above-mentioned diseases exist, there should be observed at the port of embarkation the following requirements:

1. Cholera, 5 days' observation or surveillance; disinfection of baggage.
2. Smallpox in epidemic form, vaccination or other evidence of immunity.
3. Typhus fever in epidemic form, 12 days' detention or observation; disinfection of baggage.
4. Plague, 7 days' detention or surveillance; disinfection of baggage.
5. Yellow fever, 6 days' detention or surveillance; or immunity.

(c) Thorough cleaning of all portions of the vessel, and prompt isolation of all cases of sickness which may occur on board.

VI.

Your executive committee recommends that Article IX of the convention of Washington be interpreted as follows:

ARTICLE IX. In order that a locality be considered free of contagion it will be necessary to furnish official proof to the satisfaction of the interested party:

First. That there have been no deaths nor new cases of plague or cholera for 5 days, after the isolation, death, or discharge of the last case of plague or cholera; in the case of yellow fever the period shall be 18 days, but each government reserves the right to prolong this period against those countries where the measures for the isolation of cases, the destruction of mosquitoes, and the disinfection of foci, are not observed.

Second. That all measures of disinfection have been applied, and in treating of plague cases that there have been carried out all measures for the destruction of rats; and in the case of yellow fever that the proper measures have been taken against mosquitoes.

VII.

To recommend that the Fifth International Sanitary Convention determine what constitutes immunity from yellow fever.

VIII.

To recommend to the Governments here represented the great importance of distributing, in all possible ways, instructions as to the best measures by which people may protect themselves against malaria and tuberculosis, especially by the publication of rules to control these diseases, and by making it obligatory on the part of employers of labor to supply such rules and to require their observance by their employees.

IX.

That the countries here represented adopt the models of sanitary documents herewith presented.^a

X.

To recommend to the governments represented that for future sanitary conferences there be nominated delegates who have assisted at previous conferences; and when the delegations are composed of more than one member, that one of them shall have assisted at a previous conference, or that in any case the delegates shall be sanitary authorities in their respective countries.

XI.

To request of the Bureau of Information of Montevideo to forward a report to the International Sanitary Bureau at Washington of its transactions since the Third International Sanitary Conference.

XII.

With the object of perfecting the knowledge of infectious diseases in the Tropics and to give to tropical medicine the scientific basis now held by the most advanced nations, this conference requests of the governments of the American Republics that wherever these elements of progress are lacking they encourage every project tending to provide special information on parasitology and on pathological anatomy.

XIII.

To request also of the governments of the American Republics that they favor the establishment in seaports and important cities of laboratories where not only diagnoses may be made in order to comply with the requirements contained in the resolutions of our sanitary conventions, but where also original investigations in tropical medicine and general pathology can be made along lines which the sanitary authorities deem practicable.

^a The documents referred to were bills of health.

COMMITTEES FOR INTERNATIONAL SANITARY INFORMATION.

Under the provisions of the programme, each country represented reported the names of its committee of three physicians or health officers to convey sanitary information to the international sanitary bureau at Washington or to the bureau of sanitary information at Montevideo as follows:

Colombia: Dr. J. M. Lombana Barreneche, Dr. Ricardo Amaya Arias, Dr. Juan David Herrera.

Chile: Dr. Ricardo Davila Boza, Dr. Julio Cordova, Dr. Pedro Lautan Ferrer.

Costa Rica: Dr. Carlos Duran, Dr. Elias Rojas, Dr. Jose Maria Soto A.

Cuba: Dr. Juan Guiteras, Dr. Enrique B. Barnet, Dr. Aristides Agramonte.

Guatemala: Dr. Salvador Ortega, Dr. Juan J. Ortega, Dr. Jose Azurdia.

Honduras: Dr. Jose M. Ochoa Velasquez, Dr. Ignacio Castro, Dr. Juan Angel Arias.

Mexico: Dr. Eduardo Liceaga, Dr. Jesus Monjarraz, Dr. Nicolas Ramirez de Arellano.

Nicaragua: Dr. Luis H. Debayle, Dr. Rodolfo Espinoza, Dr. Juan B. Sacaza.

Panama: Dr. Ciro Luis Urriola, Dr. Alfonso Preciado, Dr. Augusto S. Boyd.

Salvador: Dr. Tomas G. Palomo, Dr. Francisco Guevara, Dr. Rafael V. Castro.

United States of America: Dr. A. H. Glennan, Dr. J. W. Kerr, Dr. John W. Trask.

Venezuela: Dr. Pablo Acosta Ortiz, Dr. Carlos Manuel Cabado, Dr. Luis Razetti.

Santiago de Chile was chosen as the place of meeting for the next conference, to be held two years hence.

Dr. Maximo Cienfuegos, president of the superior board of hygiene of Chile, was elected president. The officers elected for the International Sanitary Bureau at Washington were as follows:

President, Surgeon-General Walter Wyman, Public Health and Marine-Hospital Service; secretary, Dr. Juan J. Ulloa, Costa Rica. Members: Dr. Eduardo Liceaga, Mexico; Dr. Pablo Acosta Ortiz, Venezuela; Dr. Rhett Goode, United States; Dr. Juan Guiteras, Cuba; Dr. Manuel Camilo Vial, Chile.

The social features during this conference included a dinner given to the delegates of the convention by the President of the Republic; a reception by the secretary of foreign affairs; a reception by the Mexican chargé d'affaires; a ball at the National Theater in honor of the delegates; a visit to the San Juan de Dios Hospital, the Chapui Asylum, the Lyceum of Costa Rica, the library building, the penitentiary, a coffee plant in San Jose, and drives about the city.

The delegates were made the guests of the nation during their stay in San Jose, where two buildings were fitted up for their accommodation.

UNITED STATES.

REPORTS TO THE SURGEON-GENERAL, PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

PLAQUE-PREVENTION WORK.

Infected Rodents.

On February 4, 2 plague-infected ground squirrels were found in Alameda County, Cal., and on February 8 a plague-infected rat was found in Seattle, Wash.

Passed Assistant Surgeon McCoy reports:

SAN FRANCISCO, CAL.

Last case of human plague sickened January 30, 1908. Last case of rodent plague trapped October 23, 1908. Total number of rats found infected to date, 398.

Week ended February 5, 1910. Sick inspected, 4. Premises inspected, 1,031. Houses destroyed, 12. Nuisances abated, 102. Poisons placed, 7,125. Rats trapped, 1,707. Rats found dead, 35. Rats identified, 1,742, as follows: *Mus norvegicus*, 1,262; *Mus ratus*, 79; *Mus musculus*, 319; *Mus alexandrinus*, 82. Rats examined bacteriologically, 1,423. No plague-infected rats found.

OAKLAND, CAL.

Last case of human plague sickened October 26, 1909. Last plague-infected rodent was found December 1, 1908.

Week ended February 5, 1910. Rats found dead, 11. Rats trapped, 480. Rats identified, 591, as follows: *Mus norvegicus*, 459; *Mus ratus*, 16; *Mus musculus*, 108; *Mus alexandrinus*, 8. Rats examined bacteriologically, 483. No plague infection found.

ALAMEDA COUNTY, CAL. (exclusive of Oakland).

Last case of human plague sickened 2 miles southwest of Sunol, September 26, 1909. Last plague-infected rodent found February 4, 1910. To the present time 62 ground squirrels and 1 wood rat have been found infected.

Week ended February 5. Ranches inspected, 12. Ground squirrels shot, 2. Ground squirrels found dead, 19. Acres covered with poison, 301. Examined bacteriologically 21 ground squirrels, of which 2 were found infected.

The plague-infected squirrels were found February 4 in vicinity of North Brae car line.

CONTRA COSTA COUNTY, CAL.

Last case of human plague sickened July 21, 1908. Last plague-infected rodent found January 15, 1910. Total number of ground squirrels found infected to date, 242.

Week ended February 5. Ranches inspected, 7. Ground squirrels trapped, 14. Rabbits trapped, 2. Examined bacteriologically, 14 ground squirrels and 2 rabbits. No plague infection found.

FRESNO COUNTY, CAL.

There is no record of human or rodent plague in Fresno County.

Week ended February 5. Ranches inspected, 31. Ground squirrels shot, 560. Ground squirrels trapped, 1. Ground squirrels examined bacteriologically, 558. No plague-infected squirrels found.

MARIPOSA COUNTY, CAL.

There is no record of human or rodent plague in Mariposa County.

Week ended February 5. Ranches inspected, 9. Ground squirrels shot, 112. Ground squirrels trapped, 1. Ground squirrels examined bacteriologically, 110. No plague-infected squirrels found.

MERCED COUNTY, CAL.

There is no record of human or rodent plague in Merced County.

Week ended February 5. Ranches inspected, 15. Ground squirrels shot, 249. Rabbits shot, 8. Examined bacteriologically 249 squirrels and 8 rabbits. No plague-infection found.

MONTEREY COUNTY, CAL.

There is no record of human or rodent plague in Monterey County.

Week ended February 5. Ranches inspected, 35. Ground squirrels shot, 347. Rabbits shot, 1. Ground squirrels found dead, 6. Ground squirrels trapped, 7. Examined bacteriologically 360 squirrels and 1 rabbit. No plague-infection found.

SAN JOAQUIN COUNTY, CAL.

There is no record of human or rodent plague in San Joaquin County.

Week ended February 5. Ranches inspected, 17. Ground squirrels shot, 42. Ground squirrels found dead, 1. Ground squirrels trapped, 4. Ground squirrels examined bacteriologically, 43. No plague-infected squirrels found.

SAN LUIS OBISPO COUNTY, CAL.

There is no record of human or rodent plague in San Luis Obispo County.

Week ended February 5. Ranches inspected, 29. Ground squirrels shot, 292. Ground squirrels found dead, 6. Ground squirrels examined bacteriologically, 296. No plague-infected squirrels found.

SAN MATEO COUNTY, CAL.

There is no record of human or rodent plague in San Mateo County.

Week ended February 5. Ranches inspected, 9. Ground squirrels shot, 60. Ground squirrels examined bacteriologically, 57. No plague-infected squirrels found.

SANTA BARBARA COUNTY, CAL.

There is no record of human or rodent plague in Santa Barbara County.

Week ended February 5. Ranches inspected, 24. Ground squirrels shot, 255. Ground squirrels trapped, 12. Ground squirrels examined bacteriologically, 266. No plague-infected squirrels found.

SANTA CLARA COUNTY, CAL.

There is no record of human plague in Santa Clara County. The last plague-infected rodent was found November 3, 1909. Total number of ground squirrels found infected to date, 9.

Week ended February 5. Ranches inspected, 4. Ground squirrels shot, 39. Ground squirrels examined bacteriologically, 39. No plague-infected squirrels found.

SANTA CRUZ COUNTY, CAL.

There is no record of human plague in Santa Cruz County. The last plague-infected ground squirrel was found November 6, 1909. No other plague-infected squirrel has been found in Santa Cruz County.

Week ended February 5. Ranches inspected, 17. Ground squirrels shot, 39. Ground squirrels trapped, 14. Ground squirrels examined bacteriologically, 39. No plague-infected squirrels found.

TULARE COUNTY, CAL.

There is no record of human or rodent plague in Tulare County.

Week ended February 5. Ranches inspected, 36. Ground squirrels shot, 370. Ground squirrels found dead, 2; trapped, 10. Rabbits shot, 8. Examined bacteriologically, 375 squirrels and 8 rabbits. No plague-infection found.

VENTURA COUNTY, CAL.

There is no record of human or rodent plague in Ventura County.

Week ended February 5. Ranches inspected, 7. Ground squirrels shot, 292. Field mice trapped, 1. Examined bacteriologically, 287 squirrels and 1 field mouse. No plague-infection found.

SEATTLE, WASH.

Passed Assistant Surgeon Glover reports:

No case of human plague since October 30, 1907. The last plague-infected rat was found February 8, 1910. Total plague-infected rats found to date, 22.

Week ended February 5. Rats received, 890. Rats necropsied, 763. No plague-infected rats found.

February 8 a plague-infected rat was found.

Inspection of vessels.—Week ended December 25, 1909. December 21, the steamship *Sungkian*, with 64 in crew and 59 passengers, en route from Hongkong to Cebu and Ililo, granted a supplemental bill of health. December 23, the British steamship *Dakotah*, with 49 in crew, en route from Hongkong to San Francisco, granted a supplemental bill of health. Personnel inspected on board prior to sailing. December 23, the British steamship *Antilochus*, with 86 in crew, en route from Glasgow to Seattle and Tacoma, granted a supplemental bill of health. Personnel inspected and passed at hour of sailing.

December 23, the American steamship *Manchuria*, with 264 in crew and 90 cabin and 707 steerage passengers, granted a bill of health for San Francisco. Cargo inspected and manifests viséed. Personnel inspected and passed on board at hour of sailing. December 24, the Norwegian steamship *Solstad*, with 39 in crew, en route from Phnom Penh to Iloilo, granted a supplemental bill of health.

Week ended January 1, 1910. December 26, the Japanese steamship *Otaru Maru*, with 39 in crew, en route from Muko to Zamboanga, Jolo, Parang, and Iligan, granted a supplemental bill of health. December 27, the British steamship *Indrani*, with 58 in crew, granted a bill of health for Boston and New York via Cebu. Cargo inspected and passed and manifests viséed before sailing. No inspection of personnel was made on account of vessel's next port of call being Cebu, where final inspection of personnel will take place.

ILOILO—Inspection of Vessels.

Assistant Surgeon Hurley reports, January 3, through Chief Quarantine Officer Heiser:

Month of December, 1909. Forty-two vessels, having a total of 1,960 in crew and 410 cabin and 590 steerage passengers, were inspected. Of this number 31 vessels were from island ports. Bills of health were issued to 13 vessels. Eleven vessels were fumigated to destroy vermin, and 195 vaccinations were performed.

The port of Iloilo is free from the infection of Asiatic cholera and smallpox.

RUSSIA.

LIBAU—Examination of Emigrants—Smallpox—Plague in Russia.

Acting Assistant Surgeon De Forest reports, February 1:

Week ended January 31. For steamship *Russia*, sailing February 1, 186 passengers and 130 members of crew have been examined. Baggage inspected, 101 pieces.

At Libau 5 cases of smallpox are reported; at Astrakhan 16 cases of plague with 13 deaths.

VENEZUELA.

LA GUAIRA—Inspection of Vessels—Sanitary work.

Acting Assistant Surgeon Kellogg reports, January 30:

Week ended January 29. Vessels inspected: January 24, steamship *Zulia* for New York, with 51 in crew and 4 passengers taken on at this port; January 25, steamship *Normandie* for Colon, with 183 in crew and 55 passengers in transit and 5 taken on at this port; January 26, steamship *Philadelphia* for San Juan, with 63 in crew and 6 passengers taken on at this port.

The report of the bureau of public health at Caracas for the week ended January 29 shows as follows: Houses disinfected, 23; premises on which standing water was treated, 584; houses inspected, 288; dead inspected, 56; rats examined bacteriologically, 48. No plague-infected rats were found.

No quarantinable diseases are reported at La Guaira, Maiquetia, or Puerto Cabello.

February 25, 1910

CHOLERA, YELLOW FEVER, PLAGUE, AND SMALLPOX.

Reports Received During Week Ended February 25, 1910.

[These tables include cases and deaths recorded in reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State and from other sources.]
